PROJECTS

WeatherInsights

- Built a full-stack weather forecast application integrating the OpenWeatherMap API to display real-time weather data from South American cities.
- Developed backend with Spring Boot and MySQL for data management.
- Designed responsive frontend using React and TailwindCSS for a modern UI.
- Implemented Recharts library to visualize weather trends with interactive charts.

Growlythics

- A personal project to proof my skills in frontend design using modern frameworks like Next.js and TailwindCSS.
- An application that help you with your finances, creating possible scenarios depending on how much you want to save or spend.
- The page includes modern animations and effects that make a good sense when you see the page.

CERTIFICATES

- Scrum Fundamentals Certified – ScrumStudy (2023)
- Negotiation, Mediation & Conflict Resolution – ESSEC (Coursera, 2024)
- Databases for Data Scientists – University of Colorado Boulder (Coursera, 2025)
- Data Management and Storage in the Cloud – Google (2025).
